

1

Print this PDF

it's important to set scale of document to 100%, so size of marking stencils will perfectly match the size of your metal cards

2

Mark your seed on the stencil

Do not worry, there are only 4 boxes for each words. 4 leading characters of each word is enough to recover your wallet.

3

Cut out marking stencils and stick them on metal cards

It should be perfectly aligned. Hold it on place by a tape, or by a glue stick. Keep in mind, you will remove it later, so do not use strong adhesive.

4

Punch a dent for each marked character

Use automatic center punch tool, or punch tool with hammer. The deeper the better.

5

Unstick used stencils and destroy them

There is marked seed on the stencils. Throw them to the trash bin is not safe enough, burn them.

6

Check if seed is marked correctly

Use printed reader to read your seed. Make sure, your seed is backed-up right.

7

Store the seed backup cards securely

Put it in envelope and store it in safe place.
